PORSCHE

Design and Highlights

The design of the 911 Club Coupe, based on the 911 Carrera S Coupe, illustrates a high degree of individuality. This is particularly emphasized by the classic exterior color to sample "Brewster Green. The selected "Brewster Green" is a tribute to the typical color of the Porsche family cars. An effective contrast is made by the window trim in high gloss aluminium.

Corresponding to the trim strip is the lettering "911 Club Coupe" in a decorative lettering on the doors. The standard Sport Design Package, consisting of a distinctive front with front spoiler and a rear spoiler is derived from the classical "duck tail". This emphasizes the sportiness from every point of view.

PORSCHE

Design and Highlights

The 911 Club Coupe is powered by a Carrera S boxer engine with gasoline direct injection and power upgrade to 430 hp (+30 hp compared to the 911 Carrera S) with a max. torque of 440 Nm. The Carrera S Powerkit contains modified cylinder heads and camshafts, a newly developed variable resonance-type intake system with switchable flaps, center radiator, a sports exhaust system with two dual tailpipes in a unique design with a concise sound, the Sport Chrono Package with dynamic engine mounts,

an optimized engine management plus a new engine bay styling with a titanium-colored cover and inserts in carbon fiber. The sprint from 0-100 km/h is mastered by the 911 Club Coupe in the Sport Plus mode with the associated Porsche Doppelkupplung (PDK) in 4.0 seconds.

PORSCHE

Design and Highlights

The performance is highlighted by the PASM sports suspension (Porsche Active Suspension Management) with an electronically controlled damping system with two manually controllable electronic maps including a lower suspension setting by 20 mm and the partially Brewster Green painted and sheen 20-inch Sport Techno wheels (front axle 9.0 x 20 ET 51 with tires 245/35 ZR 20 and rear axle 11,5 x 20 ET 68 with tires 305/30 ZR 20). The interior is characterized with full natural leather in Espresso with stitching in Luxor Beige.

Here as well, the classic sportive character is continued in line with the exterior design. Accents such as the air vents including louvers or the seat backrests of the Sports Seats Plus with natural leather in Espresso and a decorative stitching in Luxor Beige illustrate the craftsmanship and attention to detail from Porsche Exclusive. The aluminum interior package, consisting of the door entry guards as well as the switch panel trim and the PDK gear selector, everything made of brushed, anodized aluminum, create a contrast to the dark brown natural leather.

PORSCHE

Design and Highlights

Developed specifically for the 911 Club Coupe, the switch panel trim strip is fitted with a personalized laser engraving "911 Club Coupe – personally built for" and the name of the client. Further unique highlights are the leather key pouch in Espresso with stitching in Luxor Beige and embossed lettering "911 Club Coupe" as well as the illuminated door entry guards painted in Brewster Green with an inlay made of brushed stainless steel. Here too, the inscription "911 Club Coupe" in white light appears, tuned to the light

atmosphere of the interior. The anniversary logo "60 Years of Porsche Clubs" is implemented unlit on the door entry guards.
